Distributors choose Custom PVC USB Flash Drives with amazing results

Custom USB Drive created for the *We Bare Bears* TV series

Our custom molding process creates an exceptional level of detail and craftsmanship, with endless possibilities for your Custom PVC USB Drive!

All-In-One® offers custom-molded PVC USB Flash Drives to fulfill your customer's exact needs. The process uses our expert PVC molding capability to create a very high level of detail and craftsmanship, with endless possibilities for product design. Customized PVC can be molded into a huge variety of shapes and colors using Pantone Matching System, to create the exact look and feel any client desires.

Each product produced at All-In-One® is individually crafted, hand decorated and inspected for precise imprint and logo accuracy. As the leader in custom USB drives, All-In-One® makes it very simple to place an order. Simply send a logo/photo. All-In-One® will create a virtual proof for you to show your client and approve. Then All-In-One® produces your custom PVC flash drive.

One impressive case study is the Three Bears custom flash drive project, created for the new *We Bare Bears* television show on the Cartoon Network. The Three Bears custom flash drive project was so successful that the distributor's client began packaging them into a limited edition of the retail game Jenga. Naturally, this created a demand for higher quantities and more frequent orders of the Three Bears drives. This project involved All-In-One's expert graphics team setting up the artwork and collaborating with the skilled factory team to create the Three Bear characters, including the Grizzly, Panda and Polar bears. Featuring smoothly rounded organic shapes stacked upon one another, a hidden USB was located within the stacked bears to add to the WOW factor. The distinctive facial details of the custom PVC drives added an undeniable fun factor to the project. The critical production runs of the Three Bears custom flash drive project became so successful it surpassed the client's expectations and was showcased at the Comic-Con!
