# EncryptUSB™ - Personal Data Protection

*An automatic encryption tool*

- ✓ Keeps USB drives protected against unauthorized access and encrypts every file placed on the drive.
  - All user files are AES256Bit encrypted and password protected
  - Encryption supports HIPAA compliance
- ✓ Runs from USB drive, no host installation required.
- ✓ Works with OS-native File Manager (Win Explorer)
- ✓ Product field updates
- ✓ Check all user files for viruses before they get encrypted

# EncryptUSB™ & DriveSecurity™ - Integrated

*Keeps your files protected and malware free*

---

- **Challenge:** *How to ensure that the files put on the standard portable drive are password protected, encrypted, and malware free.*

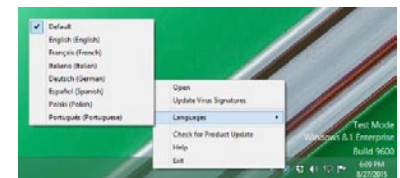

- **Solution:** *EncryptUSB™ with DriveSecurity powered by ESET has two powerful portable USB drive utilities that protect the USB drive:*

- EncryptUSB™ - Automatic AES256Bit encryption tool - ensuring all files put on the portable drive are encrypted, and
- DriveSecurity™ powered by ESET ensuring all files are malware free.

- **Features:**

- ✓ Runs from USB drive, no host installation required
- ✓ All files are scanned for malware before they get encrypted
- ✓ Supports multiple languages
- ✓ Product updates

# EncryptUSB™ & DriveSecurity® - Integrated

*Keeps your files protected and malware free*

## EncryptUSB™

- Encrypts every file placed on the drive
- All user files are AES256Bit encrypted and password protected
- Encryption can sustain HIPAA compliance
- Works with OS native File Manager (Win Explorer)

## DriveSecurity® powered by ESET

- Scans drive's content for viruses, spyware, Trojans, worms, rootkits, adware and other internet threats
- Malware is deleted automatically when detected
- Virus signature updates checked automatically (every hour)
