

# PROMO TODAY™

## A One-of-a-Kind Pen with Incredible Benefits

Everyone deserves freedom of expression and the ability to write easily and legibly. We are mindful of our customers' needs, including the difficulty that people diagnosed with diabetic nerve pain and/or severe arthritis have in gripping a pen. With these needs in mind, we developed the Color Pro Stylus Pen™. This unique pen has a comfortable and ergonomic form that helps to alleviate pain caused by gripping. The pen has two-flat sides, creating the perfect canvas for your Brand. In order to guarantee high quality and exclusivity, we have patented the Color Pro in both the U.S. and China.

The Color Pro Stylus Pen™ is a click action retractable pen with touch stylus, which features colorful grips designed to complement large full color imprints. The imprint is UV light cured, guaranteeing the most durable, long-lasting imprint. Not to mention that the large 2-sided imprint area is great for co-branding, adding multiple logos for a shared sponsorship, or even an eye-catching background. Be as creative as you can! This pen uses our Easy-Glide™ Hybrid Jumbo Ink Cartridge, and comes in an array of grip colors, including Blue, Green, Smoke, Orange, Red, White, and Aqua.

The Color Pro Stylus Pen™ is popular with national insurance, real estate, health and tech companies, hospitals, and more. With its memorable style and vibrant colors, our exclusive Color Pro Stylus Pen™ is sure to increase your Brand recognition and accomplish their marketing objectives.
