## *Keep Your Battery in the Green with the Green Line® Rechargeable PowerBank*

The portable powerbank market is highly saturated. The wide variability in quality across the market makes it much more difficult to find trustworthy products, leaving our devices draining while we battle to find the closest wall outlet before others beat us to it.

At All-In-One® we're committed to providing our customers with top of the line products. In pursuit of this commitment, we developed the exclusive Green Line® rechargeable powerbank, with a 5000mAh rechargeable battery. With the ability to charge your phone numerous times and a durable metal casing, this powerbank is sure to be your most reliable new asset. Not to mention that its sleek anodized aluminum black case is perfect for making your client's brand stand out. The powerbank also features a battery charge display, built-in overcharge protection, and a super-bright LED flashlight.

This powerbank is USB compatible and requires a charging cord to connect to your device. A great compliment to the Green Line® rechargeable powerbank is our ReadyCharge™ Portable Charging Cable and Key Ring. With this addition, you'll never be without a charge!

The Green Line® rechargeable powerbank makes an impressive holiday gift, which is why we've added it to All-In-One's® Holiday Must-Have list. Don't let any competitors beat you to the charge! Always choose the Green Line® powerbank to keep devices at **100**. Call for your free virtuals, today!
